

Thurcroft

Portable Gas Stove

A unique mobile gas stove with a realistic living flame that gives the warmth, appearance and atmosphere of a traditional stove.

If you feel a chill anywhere around the house, just wheel your mobile heater to wherever you need it.

Mobile heaters are highly efficient, providing instant heat and better control over your fuel costs.

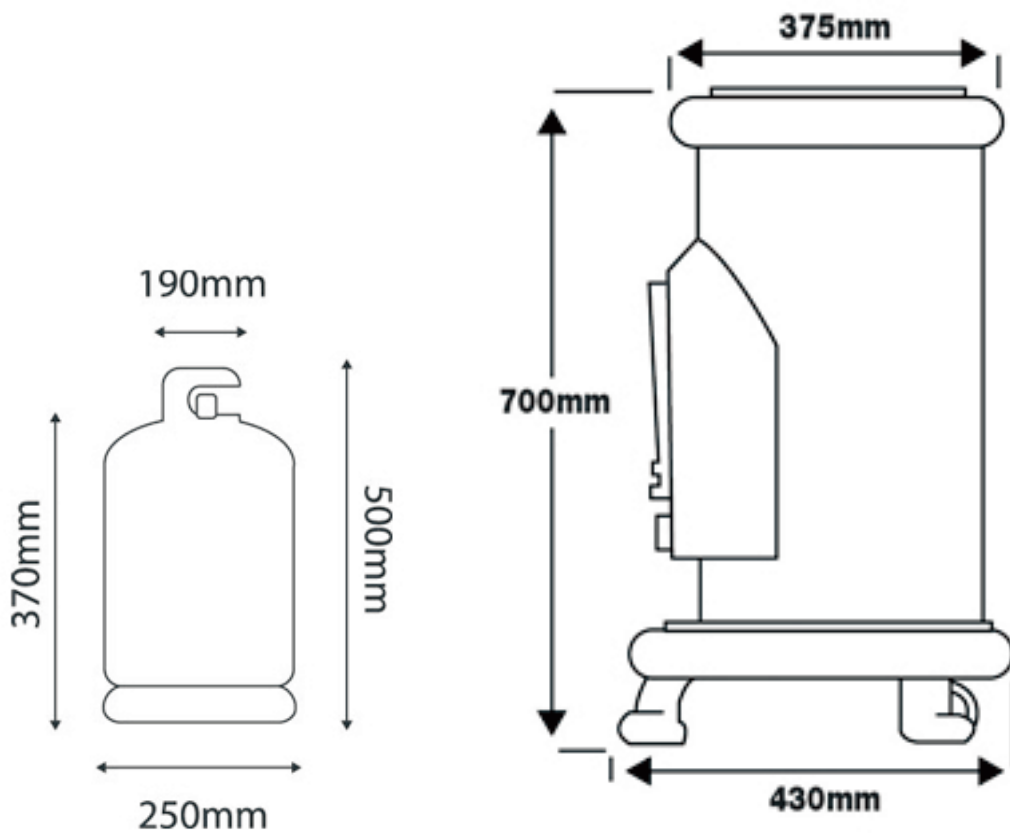

- Self contained gas cylinder housed within body of stove.
- No installation or chimney required.
- 100% efficient with a maximum heat output of 2.4kW.
- Up to 60 hours burning time from one 7 kg bottle.
- atmosphere sensing device which turns off the gas if the flame goes out or if the level of oxygen in the room falls below a recognised safe level.
- High level user friendly control.

Dimensions

Output: 2.4Kw

Weight: 22Kg

The Thurcroft stove is designed and produced in the UK
